				HAD/CAD - what is it? What is its role in modern day Dental Laboratories?
18:00			18:00	

18:30 Exhibition & Cocktail sponsored by Traders & DENTASA

Saturday 31 May

7:30 Registration

8:30 Fossils Study Group: Back to the Future

9:15 AGM

11:45 Tea & Exhibition

12:15 Key Note Speaker: **Vanik Kaufmann-Jinoian: "Will CAD/CAM replace conventional lab techniques?"**

This presentation will show you the possibilities off using CAD/CAM systems and the various material used in a dental laboratory. With today's possibilities of CAD/CAM it is essential that the professional user has the knowledge what type of material to select for achieving high aesthetics and long lasting restorations.

Vanik Kaufmann-Jinoian who has been instrumental in the development of CAD/CAM software for various companies, and will give in depth information on CAD/CAM systems that are feasible and economical for most dental laboratories. During this presentation the speaker will also cover the possibilities of designing custom abutments from zirconium oxide or titanium that gives the patient many possibilities of getting the highest aesthetics.

13:00 **Dr. Nic Anderson (Deputy General Manager: Discovery Health)**
Direct claiming from medical aids.

13:30 Lunch & Farewell Drinks sponsored by Wright Millners

19:30 Awards Dinner
Dress: Formal
